County Clare

776 ravens and owls connected with the Ross-Lewins, Westropps, and other families as death warnings have already been referred to (p. 190).

X. *Spectral Lands and Cities.*

773 Clare formed a part of the outmost fringe of the ancient world, and its people were deeply impressed with the mysteries and wonders of the Outer Ocean. The voyage of Maelduin tells of the son of a Clare man sailing out into "the great endless deep" and finding isles of surpassing beauty and wonder, and the "Hui Corra" in deep repentance sailed towards the setting sun from the creek at the northern bound of Clare "to meet the Lord on the sea."[20] St. Brendan, eager to seek out new islands, went for advice to St. Enda, a saint closely connected with Clare, (where Killeany bears his name), and its appanage, Aran. In the bay to the north of Clare William Ires, a native of Galway, became accustomed to the ocean which he crossed with Columbus, and it may be that his tales of Hy Brasil, of St. Brendan's Isle, and of the "thrice fifty distant Isles in the ocean to the west of us. Larger than Erin, twice is each of them, or thrice,"[21] encouraged the frightened sailors of the great Admiral to persevere a little longer.

[792]

Hy Brasil,[22] the Isle of the Blessed, is possibly a legacy from ancient paganism, which placed its Tirnan-oge, The Land of Youth, in the waves "on the west side down from Aran, where goes the sun to its couch."[23] The desire for the ageless, deathless land prevailed all up the western coast, and was strong in Kilkee in 1868-78, and perhaps even still. I myself saw the mirage several times in 1872 giving the perfect image of a shadowy island with wooded hills and tall towers springing into sight for a moment as the sun sank below the horizon. I have also heard from Kilkee fishermen legends, like that embodied in the verses of Gerald

regarded as a highly suggestive phrase, and I have seen it redden cheeks and lower glances in a pub. Both step- and set-dancing are practiced in Inis Beag, although the former type is dying out. This rigid-body dancing, from which sex is removed by shifting attention below the hips, appears to have originated in Ireland during the early nineteenth century. The set patterns keep partners separated most of the time; but, even so, some girls refuse to dance, because it involves touching a boy. Inis Beag men, while watching a woman step-dance, stare fixedly at her feet, and they take pains to appear indifferent when crowding at a party necessitates holding women on their laps and rubbing against them when moving from room to room. But they are extremely sensitive, nevertheless, to the entire body of the dancer and to these casual contacts, as are the women. Their covert emotional reactions (which become overt as much drink is taken) are a form of catharsis.

SEXUAL REPRESSION: ITS HISTORICAL CAUSES

Analysts of Irish character have put forth various hypotheses to account for sexual repression, ranging from the sophisticated to the absurd. The former can be classified under three rubrics: historical (e.g., the influence of ascetic monasticism, Augustinianism, and Jansenism), sociocultural (e.g., the Oedipus complex in the Irish family and male solidarity), and psychological (e.g., masochism). Beyond serious scientific consideration are such hypotheses as the loss of the Irish tongue, lack of a Catholic aristocracy, fear of Protestant libertinism, and the ever-appealed-to factors of race, climate, and the famine. In the following paragraphs, I will quote excerpts from Irish authors and from critical observers of the Irish scene, including social scientists, rather than dissect their views myself.

Paul Blanshard, in his polemical but insightful (and, in my estimation, often understated) work, *The Irish and Catholic Power*, says that "whatever the explanation, the total sexual expression of the Irish people is much less than it is in other countries, and that the Catholic crusade against normal sexual life has actually created a nation of men and women who try to drown their fundamental instincts." In attempting to account for sexual repression on such a scale, he writes:

Ireland was . . . one of the world's most ascetic countries, and the monastic ideal has undoubtedly left a deep mark on the Irish mind. Although Irish priests were permitted to have wives as late as the eighth century, sexual renunciation came to be identified with virtue and distinction in the community, and thousands of the best men and women lived apart from each other. Kevin Devlin in his *Christus Rex* article on "Single and Selfish" . . . says of the ancient Irish that "when they 'fell in love with Christianity' . . . they took to the ideal of virginity with a Pauline enthusiasm unknown elsewhere. St. Patrick himself noted this with an inflection of surprise in the *Confessions* . . ." (Blanshard 1954: 160–161).

Several Irish scholars since 1955 have expressed the opinion in personal conversations that the rapidity of Irish conversion to monasticism in the early medieval period can be attributed, in large measure, to masochism. [53] This ancient character trait is most evident in the projective system of early Irish verbal art, if one discounts the possibility of widespread distortion through the actions of Celtic defense mechanisms and later revisionists.

In a recent book, the impact of Augustinianism at this time and in the centuries to come is examined by Fr. Alexander Humphreys. He says in *New Dubliners:*

> The specific doctrinal tradition to which Ireland and the Irish countryman in particular has fallen heir is the Augustinian. . . . [It] lays relatively greater emphasis on the weakness and evil to which human nature is prone as the result of original sin. By the same token, it attributes relatively less efficacy to natural knowledge and human action and relatively more validity to God's revelation and more power to the action of God's grace. . . . [The] Irish countryman has acquired a more than average distrust of native human reason. As a Catholic he cannot and does not deny the validity of rational thought, but he tends to be quite suspicious of the pride of the mind and so wary of ultimate rationalism that he shies away from reasoned discussions of high truths. . . . The tradition he inherits tends toward a certain historical and theological positivism in regard to the major truths and values of life, and, together with other historical factors, has led him to an intensified reliance upon the teaching power of the Church as voiced by the clergy. At the same time, while appreciating the need for positive good works, he is inclined to place relatively greater emphasis on those which are directly concerned with obtaining grace and relatively lesser store by simple ethical behaviour. And finally, although he is certain that man's bodily nature with its emotions is at root good, he is rather more suspicious of it and deals with it somewhat more severely. As a result he inclines to a jaundiced view of sex and a generally ascetic outlook which

places a high premium upon continence, penance and, in most spheres of life, on abstemiousness (Humphreys 1966: 25–26).

[114]

Humphreys further points out that "the effects of the religious tradition of the Irish, let alone of the countryman, upon the social behavior and attitudes of the people has never been systematically studied from a sociological point of view." He notes that the classic study, *Family and Community in Ireland*, by Conrad Arensberg and Solon Kimball, based on research done over thirty years ago, "leaves the matter virtually untouched," and "attributes the countryman's attitude towards sex almost exclusively to the structure of life in the rural community."

> Granted the profound influence social structure has on such a basic matter, a purely structural-functional analysis is hard put to explain adequately the quite ascetic sexual morality of the Irish countryside. . . . [An] attitude similar to that of the countryman is far from uncommon in a city such as Dublin—and among New Dubliners and Old Dubliners to boot—whose social structure differs so radically from that of the countryside. Structural-functional explanations of attitudes do hold up to a point. But world-views and their ethical consequences also have their special effect (Humphreys 1966: 24–27).

Monasticism and Augustinianism certainly "set the stage" for later Jansenism, although all three probably are connected with basic Irish culture and personality traits of long standing.

Jansenism is succinctly placed in its historical context in Ireland by Joe McCarthy.

> Like most everything in Ireland, the severe strictness of the old-time Catholic clergymen was rooted in historical events of the country's past. During the dark era of the anti-Catholic Penal Laws in the 18th Century, young Irishmen had to study for the priesthood on the Continent. In the early 1790's, the British Government became alarmed by the rise of Theobald Wolfe Tone's Irish Protestant revolutionary movement and made hurried bids of appeasement to Irish Catholics in an effort to win their loyalty. One of these conciliatory moves was the establishment of the Catholic theological seminary at Maynooth in 1795. Perhaps not entirely by accident, the faculty of the new college was staffed by refugees from the French Revolution, promonarchy theologians who hated Tone's republican ideas. Most of these theologians had been influenced by Jansenism—the rigid and gloomy doctrine, denounced as Calvinistic by the Jesuits, that man is a helplessly doomed being who must endure punishing soul-searching and rigorous penances to prove his love of God. Mere faith and constant church-going . . . are not
